Faculty Workshop Completion Report

Synthetic contradictory example | Academic QA | 18 October 2026

01 | Report metadata

Activity: Data Science Faculty Accreditation Workshop. Department: Computer Applications. Coordinator: QA Placeholder. Reported event date: 10 October 2026. Report preparation date: 8 October 2026. The document claims to have been finalized before the event and gives no explanation.

02 | Executive summary

The report claims the workshop achieved complete participation, perfect results and zero budget issues. No source documents, attendance registers or evaluation sheets accompany the claim. It asserts that all figures were independently verified, but the verification procedure and responsible reviewer are not identified.

03 | Planning and methodology

The workshop reportedly used lectures, assessments and a practical session. The agenda is not supplied and the number of sessions is inconsistent: the summary states four sessions, while the activity narrative lists only two. No details are provided about the assessment criteria or grading procedure.

04 | Activity timeline

8 October 2026: final completion report allegedly signed. 10 October 2026: event reportedly conducted. 12 October 2026: coordinator reportedly began compiling results. The sequence conflicts with the claimed completion and signing date.

05 | Attendance and quantitative outcomes

Total participants: 120. Passed: 94. Failed: 29. Absent: 8. The component counts add to 131, not 120. Claimed pass rate: 90%. Using the stated total, 94/120 is approximately 78.3%, not 90%. Claimed faculty participation: 100%. Listed faculty attended: 17 out of 23, or approximately 73.9%. The report repeats all three unsupported claims without reconciliation.

06 | Outcomes and evidence claims

The author states every participant completed the course, even though the attendance section reports 8 absent and 29 failed. An unnamed external auditor allegedly approved the findings. The auditor’s report, registration ledger, assessment sheet, completion certificates and photographic evidence are all missing.

07 | Financial summary

STAFF SUBMISSION | HARD

Faculty Workshop Completion Report

Synthetic contradictory example | Academic QA | 18 October 2026

Approved budget: INR 15,000. Venue: INR 7,000. Materials: INR 6,000. Refreshments: INR 5,000. Claimed total expenditure: INR 12,000. Claimed unspent funds: INR 5,000. The actual itemized costs sum to INR 18,000, which exceeds the budget by INR 3,000. The stated expenditure and balance are contradictory.

08 | Conclusions

The report concludes that all requirements were fully met, although mandatory format sections, evidence, a consistent date sequence and accurate calculations are absent. A careful AI assessment should quote the contradictory figures, identify omitted reference headings and recommend HOD review or correction. This is deliberately flawed synthetic content for evaluation only.
