HOD REFERENCE FORMAT

Faculty Workshop Completion Report

Reference template | Academic QA | Synthetic test only

Purpose

This reference PDF defines the expected structure of a faculty workshop completion report. The HOD supplies this file as the assignment format. Staff must produce a completed PDF following these sections. The AI reviews the staff PDF against this reference and the HOD's plain-language assessment instructions.

01 | Report metadata

Include report title, department, faculty coordinator, academic year, workshop date, venue and date of submission. Use consistent dates in the title page, activity narrative, evidence records and signature block.

02 | Executive summary

Write a concise account of why the workshop was organized, who participated, the learning outcomes and what evidence supports completion. Distinguish planned activities from activities actually completed.

03 | Objectives

List at least three measurable objectives. Connect each objective to a method and an observed result, instead of merely repeating generic descriptions.

04 | Planning and methodology

Describe the agenda, instructors, training materials, session duration, participant selection, preparation and how attendance was recorded.

05 | Activity timeline

Provide dated milestones with session descriptions. Show what happened on each day. Clarify any cancellation, rescheduling or incomplete work.

06 | Attendance and quantitative outcomes

Provide invitations, registrations, actual attendance, completion count and correct percentages with denominators. Use mutually compatible totals. Explain the source of each claim.

07 | Evidence register

List evidence identifiers, descriptions, dates and where the corresponding proof can be inspected. Examples include attendance sheets, feedback forms, dated photographs, expenditure receipts and signed minutes. Do not claim an attachment exists if it is absent.

08 | Budget and utilization

List approved budget, each expense line, the total expenditure and remaining balance. Confirm that total expenditure equals the sum of expense lines and that balance equals budget minus expenditure.

09 | Findings, limitations and conclusion

Summarize achieved outcomes, limitations, feedback, action items and a realistic follow-up plan. Claims about impact must be supported or clearly labeled as preliminary.

10 | Declaration and HOD review

Include coordinator name, submission date, a truthful declaration about the records and a signature or explicit explanation if signature evidence is not attached. Leave space for HOD review notes.

Instructions for the AI-based test

The HOD can type this in the portal's AI assessment instructions: 'Compare all required sections with the reference PDF. Identify missing sections, unsupported evidence, conflicting dates, incorrect sums and percentages, and incomplete outcomes. Quote exact evidence in the uploaded submission; label ambiguous claims uncertain. Do not infer whether the document was written by a human or AI.'
